A woman with long brown hair, wearing a white trench coat, is shown in profile, reaching up to a high shelf in a brightly lit supermarket. She is holding a small, colorful product. The background is filled with various products on shelves, creating a sense of a well-stocked store. The lighting is warm and focused on the woman and the product she is reaching for.

ABOUT US

LUXX Lichttechnik GmbH / LUXX Light Technology Ltd. represents a German headquartered international group with lighting competence and innovations since over 20 years.

Our core competences:

- Research & Development
- Design
- Manufacturing
- Quality Assurance
- Cost Control

LUXX is dedicated to slim and energy efficient linear lighting fixtures since 1997.

1997 — CCFL (cold cathode fluorescent lamp) slim and energy efficient linear lighting fixtures

2006 — LED ultraslim and energy efficient linear lighting fixtures

2012 — all LED Commercial Lighting fixtures and replacements

2013 — LED Industrial Lighting fixtures

Since 2014 LUXX presents the latest edition:

- LED refrigeration equipment lighting — freezers, coolers, chillers, cabinets
- LED fresh food lighting — cabinets, shelves and displays
- LED vending machine lighting
- LED shelf- and rack lighting

www.lightpanel.us

All LUXX refrigeration and food lighting fixtures are made using the latest LED technology, which saves double on energy costs:

- 1) LED light saves already up to 70% energy
- 2) Freezers need less cooling power because of a lower heat generation due to high efficiency

LUXX signature design:

Most of our business is OEM. We are happy to assist you in integrating our lighting technology into your appliances. Our team creates the most effective and advanced design using the latest technologies.

TRUE COLOR tech:

For the perfect presentation of different kinds of food, specially selected light colors are necessary. But not only the color temperature plays an important role, values of color temperature, color rendering and color locations need to be optimally tuned to ensure the successful high-lighting of different kinds of fresh products.

Nearly all of our products are also available in special light colors for meat, cheese, bread, fish, fruits and vegetables.

Adjusting Rail	PA20AA2021

One profile for multiple lighting beam angles:

The OPTICline Alu 12 profile offers an asymmetric inserting rail that can be placed in 2 different positions or left out. Combined with the lens type cover it offers 5 different light beam angles (depending on the LED size and height, using LUXx reference LED strips: 20° to 90°). This focuses the light and creates various wallwasher effects.

The MULTILine Alu 16 profile also works as a mounting rail for the LineProfil 12 and LineProfil 14-8 plastic profiles. The profiles can be inserted easily from the sides. Especially for installations longer than a meter this is a perfect solution to avoid the bending of the plastic profile. Using a staggered way of mounting, it also ensures a smooth linking of multiple profiles for lengths over 2.5 meters.
